EDUCATION

Bachelor of Science in Computer Science

Texas Christian University

August 2021-May 2025

Fort Worth, TX

- **Relevant Coursework:** Computer Organization, Data Structures & Algorithms, Computer System Fundamentals, Computer Networks, Database Systems, Web Technologies, Data Mining & Visualization, Machine Learning, Cloud Computing, Linux/UNIX Administration, Operating Systems, Cybersecurity

TECHNICAL SKILLS

- **Languages:** HTML/CSS, C, Java, JavaScript, Python, R, SQL
- **Tools/Technologies:** AWS, Figma, MS Office, Git, Tableau, Jira, MongoDB, SpringBoot, VueJs, React, Agile (Scrum), CI/CD pipelines

RELEVANT EXPERIENCE

Software Developer (Product and UI focus)

Corevation

August 2025 - Present

Remote, US

- Reduced onboarding drop-offs by 40% and significantly improved overall product usability and accessibility by redesigning user flows and front-end experiences through wireframes, prototypes, and iterative testing
- Increased user engagement by 15% and influenced key product roadmap priorities by conducting user testing sessions, gathering customer feedback, and translating complex insights into actionable product improvements that enhanced usability
- Collaborated with multiple cross-functional teams to ideate new features, define detailed requirements, and contribute to product naming, ensuring stronger alignment between technical delivery, user needs, and overarching business goals
- Accelerated stakeholders buy-in and reduced design-to-development cycle time by 22% by creating detailed UI prototypes and guiding product design decisions, ensuring smoother handoffs from concept to implementation across teams
- Built and maintained scalable, production-ready front-end features using Python, Vue.js, and Azure, integrating AI-powered content generation capabilities that enhanced user experience and directly increased subscription adoption by 17%
- Cut campaign setup time by 43% and improved workflow efficiency by implementing and optimizing the UI for the AI content generator, enabling batch content creation and automated publishing across multiple platforms.

Software Developer/Product Lead

Trailspur Capital Partners / Texas Christian University - Capstone Experience

August 2024 - May 2025

Fort Worth, TX

- Led the end-to-end development of a fully automated system that integrated CoStar vacancy data with county appraisal geodatabases, improving data accuracy, reducing processing time for stakeholders, and enhancing decision-making efficiency
- Facilitated user testing and gathered stakeholder requirements, translating complex real estate data into practical technical solutions and iterative product enhancements that improved system usability, accuracy, and overall stakeholder satisfaction
- Boosted data utilization efficiency by 65% and reduced operational costs by deploying a modular stack with Vue.js, AWS Lambda, and Supabase, automating workflows and eliminating manual processes to improve scalability

IT Assistant (Student Worker, Part Time)

Texas Christian University

January 2022 - October 2022

Fort Worth, TX

- Implemented streamlined resolution processes and conducted user training sessions, achieving a 50% boost in support efficiency and a 43% reduction in repeat requests, while empowering users to independently troubleshoot common issues

PROJECTS

Book Management Systems | [Code Link SQL](#) | [Code Link MongoDB](#) | Python, SQL, MongoDB

- Implemented advanced search functionality with criteria-based filters, allowing users to search and organize books by titles, ISBNs, publishers, price ranges, and publication years, simplifying management & retrieval of specific book information

Hogwarts Artifacts | [Code Link](#) | Java

- Built a Spring Boot web application with RESTful APIs and secure role-based access control, enabling efficient CRUD operations on wizard and artifact data through a seamless, user-friendly interface

Unix Shell | [Code Link](#) | C, C++

- Built a custom Unix-like shell with parallel execution, I/O redirection, & background job support; implemented fork(), exec(), & waitpid() to build a command pipeline with effective synchronization and resource management

Carbon Footprint Calculator | JavaScript, VueJs | Siemens Sustainability Hackathon 2024

- Built a web app to calculate emissions of raw manufacturing materials by integrating sustainability metrics and global standards, while collaborating with a cross-functional team to deliver an innovative & real-world solution

CAMPUS INVOLVEMENT AND LEADERSHIP ACTIVITIES

Community Manager - Led 7 Community Assistants managing operations for 350+ residents

August 2023 - May 2025

Treasurer, Women in Computer Science — Managed \$2K/semester budget for upskilling events

August 2024 - May 2025

Member - Rewriting the Code (Global Organization), Robotics and Artificial Intelligence Club

August 2023 - May 2025
